

Differences among Standard, Professional and Academic Versions

Knowing the differences among different versions of ZWCAD will help you to choose the most appropriate one according to your needs. Before making a choice, please pay attention to the following contents.

Icons

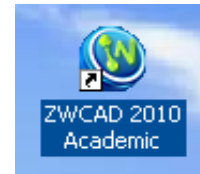

- ✧ Different version has different icon.

Standard

Professional

Academic

Titles

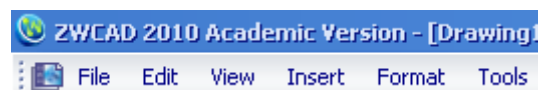

- ✧ Each version acquires a unique title.

Standard

Professional

Academic

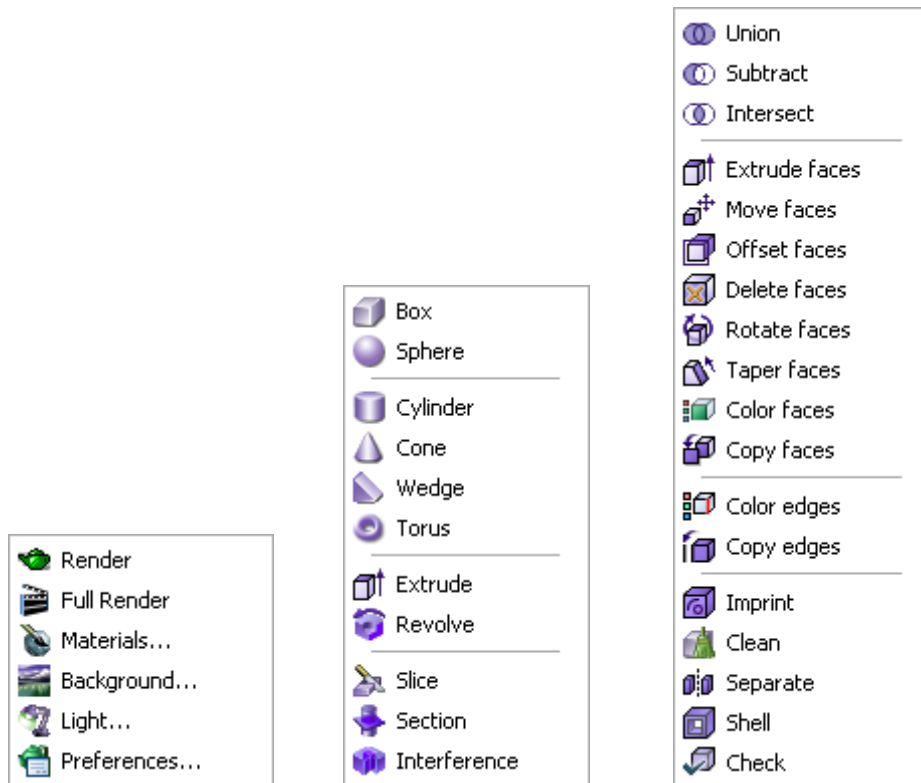

Functions

- ◆ Standard

- 1) Contains all the basic and advance features of 2D drawing.
- 2) Can display and print ACIS objects well, such as region entity, 3D drawing and the like.
- 3) Supports the following three APIS: **Lisp**, **SDS** and **ZRX**.

◆ Professional

- 1) Includes all the functions of Standard version.
- 2) Can create and edit ACIS objects, such as region entity, 3D drawing and the like.

- 3) Inserting ACIS file is available.
- 4) Be able to inquire region entity and quantity.
- 5) Support another API: **VBA**.

◆ Academic

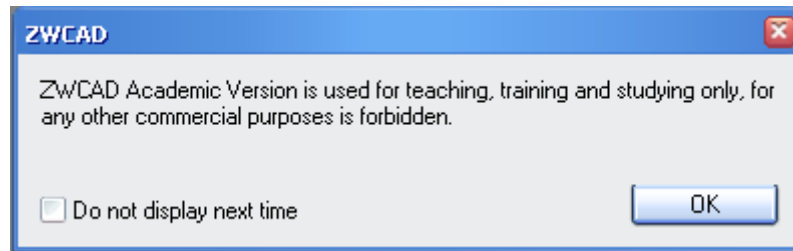

Academic version has all the functions that professional version owns.

Specials for Academic version

Compared with Standard version and Professional version, Academic version has the following difference.

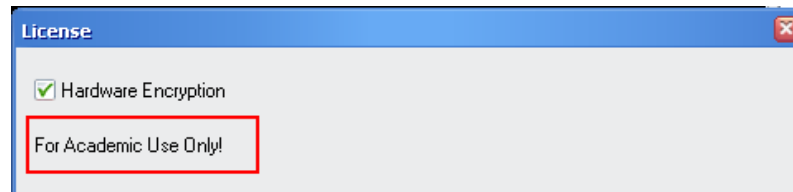

- ❖ Special prompt information

When starting the Academic version the first time, the following prompt dialog box will appear.

- ❖ Unique announcement after registration

After registration in Academic version, the following announcement will be showed.

- ❖ Water mark

When printing drawings in Academic version, there will be water marks on the page borders-- **Designed by ZWCAD Academic Version.**
