

Total Sales by Repertoire (audio+video)

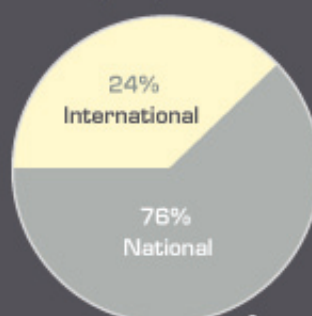

Notwithstanding the outstanding and continuous vocation of the Brazilian market for the production and consumption of its own local music (76% of total sales in 2003 in terms of units are of local production, encompassing here audio+video+ "premium"), there was a drop of 27% in the number of local releases (1080 releases in 2003, compared to 1472 in 2002). This figure shows the retraction in the local market, with more cautious investment in local releases, as the latter means higher costs when compared to international products released in the local market.
