

**Visit Barcelona  
11-12 February 2009  
- learn how to optimise  
chronic care through  
telemedicine services!**

### **Better Breathing Final Conference**

The Conference marks the end of the Better Breathing project. Better Breathing has changed the model for continuous care of chronic patients. With focus on patients suffering from Chronic Obstructive Pulmonary Disease (COPD), the project has tested solutions for:

- **Home Monitoring**
- **Home Rehabilitation**
- **Self-management**
- **Virtual Communities for Patients and professionals**

This enables patients to be monitored, cared for and rehabilitated from the comfort of their own home.

### **At the conference, you can hear about:**

- **How to improve care for COPD patients – results from Better Breathing**
- **Telemedicine as a management tool – getting all involved**
- **Evaluation methods tool – specifically designed to telemedicine services in Europe**
- **Interoperability in healthcare and telemedicine applications**
- **The future – what will we see 5 or 10 years from now**
- **Visits to live demonstrations of telemedicine services at the Hospital Clinic Barcelona**

As the results from Better Breathing are presented alongside interesting sessions on telemedicine from various angles, the conference offers a unique insight into a toolbox for chronic patient care — just as it is a great opportunity to interact with project and business

- The Conference is free of charge and open to anyone interested in participating.
